LOT 1 Mixed 14K gold jewelry (melted) — Melted November 20, 2026

PRE-MELT 40.850 g POST-MELT 40.100 g

METAL	ASSAY	FINE TROY OZ	YOUR RATE	SPOT	AMOUNT
Mixed Scrap Gold	57.9%	0.746472	94%	$3,537.90	**$2,482.49**

40.100 g x 57.9% = 23.218 g of fine gold = 0.746472 troy oz (31.1035 g per troy oz)

The pre-melt weight may not match the weight shipped. Stones and magnetic (steel) parts are sometimes removed before melting; otherwise they come out in the melt or lower the assay. Either way, the melt is handled to include and recover as much of the precious metal as possible.

LOT 2 Mixed sterling silver (melted) — Melted November 20, 2026

PRE-MELT 1,041.600 g POST-MELT 1,019.800 g

METAL	ASSAY	FINE TROY OZ	YOUR RATE	SPOT	AMOUNT
Mixed Sterling Silver	91.8%	30.098747	80%	$41.12	**$990.13**

1,019.800 g x 91.8% = 936.176 g of fine silver = 30.098747 troy oz (31.1035 g per troy oz)

TERMS

Your sale to Osiris Precious Metals (Delizia Capital, LLC) was made under our Terms of Sale. As agreed there, scrap is melted and paid on its weight and purity after melting, at the rate agreed before you shipped and spot when we begin processing your lot; gold scrap is paid on its gold alone and silver scrap on its silver alone, so any other metal in it, and stones and non-metal parts, are paid $0; and a scrap sale is final once melted. Each scrap amount is the post-melt grams x the assay, divided by 31.1035 grams per troy ounce, x your rate x the spot price shown. Each coin and bullion amount is its fine troy ounces x your rate x the spot price shown. Any fraction of a cent is rounded up, so every figure here can be checked by hand. Payment is made only to an account in the seller's name.
